Women and Men Uniting to Advance Cultural and Systemic Change in the Electronics Industry

EMPOWER • DEVELOP • ADVOCATE • CELEBRATE

Our Goals:

EMPOWER members through the Annual Conference, quarterly Chapter Meetings, Networking Events, and Discussion Groups.

DEVELOP members with our monthly professional Leadership Growth Development Program and quarterly Life Balance Series.

ADVOCATE for members and industry professionals through our Career Corner, Collegiate Efforts, and industry-wide Mentorship Program.

CELEBRATE the accomplishments and advancement of members and our sponsor organizations.

Executive Committee

Amy Keller, Jackie Mattox, and Monica Highfill

What We Do:

Increase opportunity for women and diverse talent to succeed in the Electronics Industry and related End User Markets.

Resources

- Career Corner
Collegiate Effort (Industry Recruitment)
Leadership Development Articles & Data
ESG Resources
Industry News & Updates

Our Mission:

Fueled by authenticity, courage and commitment, Women in Electronics (WE) is a community of progressive women leaders at all stages of their careers dedicated to expanding the opportunities for women in the fast-paced Electronics Industry and related End User Markets.

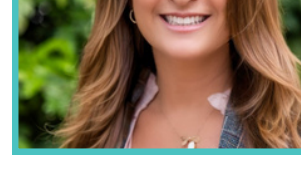

WE was formed in the fall of 2017 by a group of 20 inaugural women coming from all over the country to meet for the first conference in Laguna Beach, CA. The group was built with the premise of women working collaboratively to form a united community that aligns with our male counterparts to empower, develop, advocate, and celebrate diverse talent in the Electronics Industry and related End User Markets with the vision to serve a global community.

You can become the change you seek to create if you have the will to create it.
